

Eisen

April 17, 1961

Proceedings of the National
Academy of Sciences
2101 Constitution Avenue
Washington 25, D.C.

Gentlemen:

I am happy to communicate the enclosed manuscript by
Drs. Milton Kern, Ernst Helmsreich and Herman N. Eisen, entitled
THE SOLUBILIZATION OF MICROSONAL ANTIBODY ACTIVITY BY THE SPECIFIC
INTERACTION BETWEEN THE CRYSTALLIZABLE FRACTION OF γ -GLOBULIN AND
LYMPH NODE MICROSONES. Dr. Eisen will arrange to meet the page
costs of this publication. Please address further editorial
correspondence to him at:

60 Washington University School of Medicine
Department of Internal Medicine
Barnes and Wohl Hospitals
600 South Kingshighway
St. Louis 10, Missouri

I undertake the usual responsibilities associated with
transmitting a communication.

Yours sincerely,

Joshua Lederberg
Member
National Academy of Sciences

enc.
cc/ Dr. Herman Eisen

P.S. to Dr. Eisen:

What value of E should be in the paper? 7, 10, 13.6
(see page 2)? You can monitor this in proof.
